Summary: water leaked around the left side of windshield causing electrical failures, including but not limited to the starter, radio, windshield wipers, headlamps, etc. The water entering the vehicle wet the power distribution box (pdb) and the generic electronic module (gem). These components control various electrical systems in the vehicle.

1 Answer. 2006 ford expedition radio doesn't work. Just bought this expedition and the radio doesn't work. I removed the bezel on the dash, pulled radio out, and there is an antenna hooked up on the right rear, and a connector with wires on the left rear, but in the middle, there is a female socket for a connector that doesn't have anything plugged into it.

Step 3. Check the metal strip on the inside of the fuse. If the metal strip is burned or broken, then you need to replace that fuse with a new fuse of the same amperage. Turn the power to the radio on by pressing the power button. If the radio won't turn on at all, the unit is defective and will need to be replaced.

2006 Ford Expedition XLT My 2006 ford expedition is a great family car. It has three rows of seating of which two rows fold down for lots of cargo space. It handles great locally and on the highway. It has front and rear heat and air conditioning controls for everyone's comfort. Because this is a large, heavy vehicle it is not fuel efficient.

How to Reset Anti Theft System Ford? The anti-theft system is one such feature created to protect our vehicle from being stolen, as the name rightly suggests. When the system detects that a person is trying to start the car by using a fake key or some other unconventional method, it ensures that the engine does not start by shutting the supply of power to the engine.
