This Unipolar Stepper Motor

File Type PDF 28byj 48 5v Stepper Motor Datasheet

28-BYJ48 is provided with five wires and four coils. The center connections of the coils are tied together and usually used as the power connection. They are named unipolar steppers because power always comes in on this one pole.

**28BYJ-48 Stepper Motor -
RoboCraft**

The 28BYJ-48 stepper motor is a commonly used stepper motor, which converts electrical pulses into discrete mechanical rotation. Why is the name stepper used,

File Type PDF 28byj 48 5v Stepper Motor Datasheet

you may ask. That is because when electrical signals are applied, the stepper motor rotates in accurate and fixed angle increments known as steps.
