The Power of the Value Methodology. To identify and develop value and innovation, both private industry and government agencies have been using a process known as the Value Methodology (VM). Also known as Value Engineering, Value Analysis and Value Management, the VM process can optimize projects, processes and product development in significant ways. Through this process, companies and government agencies regularly decrease costs, increase profits, improve quality and performance, and ...

Project Management.

Abstract: Value engineering is a combination of technical and economic subjects. It is committed with the lowest life cycle cost and reliable completion of the functions required by the user. It has an important influence and function to promote the traditional product value innovation, cultivate and develop the enterprise's core competitiveness, and promote national economic and social sustainable development.

Abstract This paper aims to present an easy, quick, and accurate way of implementing value engineering (VE) studies by introducing an integrated computerized system for the VE technique and life-cycle cost as a checkout system. The VE computer program was designed using a database computer program, FoxPro Window.
