A complete resource for "teaching green" to young people in grades 6-8

Mr. Lipton ' s book is the first complete and unbiased survey of the beat generation and its role in our society. Here are the intimate facts about these people and their attitudes toward sex, dope, jazz, art, religion, parents, landlords, employers, politicians, draft boards, the law and, most important, toward the " square ". The author presents a picture of their way of life, their individual backgrounds, the language they have appropriated, in terms made clear for the first time to those of us who have been confused and puzzled about them. He also provides a balanced discussion of their literature, art and music, of what they produce and fail to produce in the arts they practice.—Print Ed.

We are currently eating, sleeping and breathing a new found religion of everything ' green ' . At the very heart of responsibility is industry and commerce, with everyone now racing to create their ' environmental ' business strategy. In line with this awareness, there is much discussion about the ' green marketing opportunity ' as a means of jumping on this bandwagon. We need to find a sustainable marketing that actually delivers on green objectives, not green theming. Marketers need to give up the many strategies and approaches that made sense in pure commercial terms but which are unsustainable. True green marketing must go beyond the ad models where everything is another excuse to make a brand look good; we need a green marketing that does good. The Green Marketing Manifesto provides a roadmap on how to organize green marketing effectively and sustainably. It offers a fresh start for green marketing, one that provides a practical and ingenious approach. The book offers many examples from companies and brands who are making headway in this difficult arena, such as Marks & Spencer, Sky, Virgin, Toyota, Tesco, O2 to give an indication of the potential of this route. John Grant creates a ' Green Matrix ' as a tool for examining current practice and the practice that the future needs to embrace. This book is intended to assist marketers, by means of clear and practical guidance, through a complex transition towards meaningful green marketing. Includes a foreword by Jonathon Porritt.

Examines the critical art of rethinking: learning to question your beliefs and to know what you don't know, which can position you for success at work and happiness at home. It is a book about the benefit of doubt, and about how we can get better at embracing the unknown and the joy of being wrong

This timely book is a sequel to John Grant ' s Green Marketing Manifesto which was the award winning and bestselling definitive guide to green marketing (and not greenwashing) in the previous wave of eco marketing in 2007. In 2019, climate change is right back at the top of the public agenda. Greta Thunberg and Extinction Rebellion are front page news. The UK, EU and other governments have declared a climate emergency. 181 CEOs of American companies - including Walmart, Amazon and Apple - signed a Business Round Table declaration saying that the purpose of corporations is not just to make money for shareholders, but to improve society, care for the environment and be ethical. Unilever CEO Alan Jope says they will dispose of brands that don ' t have a bigger purpose. Concerns like ocean plastic (the ' Blue Planet effect ') have upped the pace of change. With ambitious responses such as refills stations, unpackaged goods, super-materials from wood fibre and seaweed and a new ' milkman for groceries ' reusable packaging service called Loop. Sustainable brands are now outperforming others in most markets. Eco challenger brands like VEJA and Allbirds are ' the new cool ' . While Adidas showed (with Parlay ocean plastic shoes) you can also create a billion dollar mainstream offer. Even banking is changing, with rapid growth in ESG and Impact Investing. Plus, the \$40Bn overnight success of sustainability linked loans to companies like Philips and Prada. How can marketing and the creative industries respond? Even Extinction Rebellion thinks we can play a positive role – although XR also say it has to go beyond banning plastic straws - if we can only manage to tell the truth and lead the change. Hundreds of creative agencies and brands came out on climate strike and donated ideas: Or in the case of Patagonia donated their entire \$10m tax windfall to environmental causes. But what now? How do you set a positive course? In this book we look at some of the leaders – brands like Patagonia and Max Burgers aiming to be climate positive. And we look at brands who have found a fresh sense of purpose by championing a relevant cause. The book is packed with case studies, tools, research insights. Covering issues like eco labelling, transparency, circular economy, rebound effects, impact investment, new coalitions and developments ranging from sustainable finance, to blockchain and traceability, to regenerative farming. One key theme that carries over from the Green Marketing Book is that marketers need to know their facts if attempts are not to be superficial. When you know 95% of the energy footprint of a mobile phone is in manufacturing and materials (not charging the battery) you know that getting people to dim their screen won ' t save much CO2. But that getting them to keep their phone in use for an extra year is a huge win for the planet. The ultimate goal is to go beyond marketing that simply looks good, and to create a vision of marketing that does good. Uncover strategies for sustainable marketing that actually deliver on green and social objectives, not just greenwashing Reconceptualise marketing and business models, and learn to recognise the commercial strategies and approaches that are no longer fit for purpose Learn how hot topics like the climate crisis, single use plastics, and blockchain technology influence green and social marketing Read examples and case studies from both brand leaders and challengers that have developed innovations and fresh creative approaches to green and social marketing Get practical tools, models, facts, plus strategy, workshop and project processes and business case rationales - so that you can build your own plans and proposals This book is intended to assist marketers, by means of clear and practical guidance, through a comp

Is it foolish to think that one boy and a blood red horse can save a fair maiden and the throne of England? Will and Gavin de Granville have come back from the crusade older, braver, and definitely wiser. Ellie has been longing for their return. But they've changed. And home is almost as dangerous as the war they've just left. The king is missing. The country is in turmoil. And some men would do anything for power. What will two brothers risk for the woman they both love and the king they have both sworn to protect and serve? In the second book of the de Granville trilogy, Will and Gavin find their family - and all of England - in serious peril.
