The clock plays a significant part in our understanding of temporality, but while it simplifies, regulates and coordinates, it fails to reflect and communicate the more experiential dimensions of time. As Helen Powell demonstrates in this book, cinema has been addressing this issue since its inception. Stop the Clocks! examines filmmakers' relationship to time and its visual manipulation and representation from the birth of the medium to the digital present. It engages both with experimentation in narrative construction and with films that take time as their subject matter, such as Donnie Darko, Interview with a Vampire, Lost Highway and Pulp Fiction. Helen Powell asks what underpins the enduring appeal of the science fiction genre with filmmakers and audience and how cinematography might inform our conceptualisation of other imagined temporal worlds, including the afterlife. She examines the role of angels and vampires in contemporary cinema, as well as the distinctive time schemes of new media and their implications for rethinking time and the moving image through digitalisation. Broad based and accessible, Stop the Clocks!

Among the contributions of the medieval church to western culture was the idea that marriage was one of the seven sacraments, which defined the role of married folk in the church. Although it had ancient roots, this new way of regarding marriage raised many problems, to which scholastic theologians applied all their ingenuity. By the late Middle Ages, the doctrine was fully established in Christian thought and practice but not yet as dogma. In the sixteenth century, with the entire Catholic teaching on marriage and celibacy and its associated law and jurisdiction under attack by the Protestant reformers, the Council of Trent defined the doctrine as a dogma of faith for the first time but made major changes to it. Rather than focusing on a particular aspect of intellectual and institutional developments, this book examines them in depth and in detail from their ancient precedents to the Council of Trent.

One of the most

important texts in the Western magical tradition for nearly 500 years, Heinrich Cornelius Agrippa's 1533 work *Three Books of Occult Philosophy* collates a multitude of sources from the Classical, Medieval, and Renaissance periods and organizes them into a coherent explanation of the magical world. Divided into three parts--the natural world, the celestial world, and the divine world--the book systematically explains the philosophy, logic, and methods of magic and astrology and how they work. The basis for 19th-century magical orders such as the Golden Dawn and a primary source for countless books on magical uses of stones, herbs, incense, and astrology, Agrippa's many lists and diagrams have proven invaluable to magicians since the 16th century. Yet, until now, all English editions of Agrippa's *Three Books* were based on the same flawed 1651 translation from the mysterious "J.F." In this new translation from the original 1533 Latin edition, Eric Purdue corrects the many mistranslations, copyist mistakes, and errors introduced from other editions as well as restores all of Agrippa's original illustrations. Purdue notates every correction and offers commentary, drawing on major developments in the research of older magical and astrological texts. He also presents a nearly complete bibliography of Agrippa's primary sources, revealing Agrippa as a mainstream scholar of his day. Presenting the first new English translation of *Three Books of Occult Philosophy* in more than 350 years, this three-volume hardcover boxed set repairs the gaps in knowledge pervasive in the original translation and restores the magical spirit of Agrippa's masterpiece, allowing us to hear Agrippa speak again.
