Targets are an important part of our work life, whether we are setting them or meeting them. Target setting forms part of the budgeting process and the performance management of business units and individuals. Unfortunately the behavioral impacts of target setting on performance are not well understood, and this can lead to serious consequences such as game playing. Target setting is an under-researched area. This book will help you fill the gap in target setting for performance. The pivotal issue in target setting is that it is an art as well as a science. Perhaps more of an art, requiring a balance between the psychologies of the people taking initiatives, the science of estimating probabilities and aligning with strategies, coupled with the effects of incentives. Another feature of this book is how the authors drew on ideas and research across disciplines, which is rarely done in this field. Inside this book, you will be introduced to some of the important methods in target setting such as forecasting, sensitivity analysis, and probability analysis; all of which include practical examples to show how these techniques can be directly applied. In the end, you'll learn how interrelated the various parts of organizational activities are and how they impact on each other, which is important since target setting must include an understanding of the organizational context (e.g., people, competitive environment, structure, strategy) as well as the impact of incentive compensation and information flows.

"The purpose of this book is to present relevant questions on diagnostic testing that arise in everyday emergency medicine practice and to comment on the best available evidence"--Provided by publisher.

Centuries-old community planning practices in Indigenous communities in Canada, the United States, New Zealand, and Australia have, in modern times, been eclipsed by ill-suited western approaches, mostly derived from colonial and neo-colonial traditions. Since planning outcomes have failed to reflect the rights and interests of Indigenous people, attempts to reclaim planning have become a priority for many Indigenous nations throughout the world. In Reclaiming Indigenous Planning, scholars and practitioners connect the past and present to facilitate better planning for the future. With examples from the Canadian Arctic to the Australian desert, and the cities, towns, reserves and reservations in between, contributors engage topics including Indigenous mobilization and resistance, awareness-raising and seven-generations visioning, Indigenous participation in community planning processes, and forms of governance. Relying on case studies and personal narratives, these essays emphasize the critical need for Indigenous communities to reclaim control of the political, socio-cultural, and economic agendas that shape their lives. The first book to bring Indigenous and non-Indigenous authors together across continents, Reclaiming Indigenous Planning shows how urban and rural communities around the world are reformulating planning practices that incorporate traditional knowledge, cultural identity, and stewardship over land and resources. Contributors include Robert Adkins (Community and Economic Development Consultant, USA), Chris Andersen (Alberta), Giovanni Attili (La Sapienza), Aaron Aubin (Dillon Consulting), Shaun Awatere (Landcare Research, New Zealand), Yale Belanger (Lethbridge), Keith Chaulk (Memorial), Stephen Cornell (Arizona), Sherrie Cross (Macquarie), Kim Doohan (Native Title and Resource Claims Consultant, Australia), Kerri Jo Fortier (Simpco First Nation), Bethany Haalboom (Victoria University, New Zealand), Lisa Hardess (Hardess Planning Inc.), Garth Harmsworth (Landcare Research, New Zealand), Sharon Hausam (Pueblo of Laguna), Michael Hibbard (Oregon), Richard Howitt (Macquarie), Ted Jojola (New Mexico), Tanira Kingi (AgResearch, New Zealand), Marcus Lane (Griffith), Rebecca Lawrence (Umea), Gaim Lunkapis (Malaysia Sabah), Laura Mannell (Planning Consultant, Canada), Hirini Matunga (Lincoln University, New Zealand), Deborah McGregor (Toronto), Oscar Montes de Oca (AgResearch, New Zealand), Samantha Muller (Flinders), David Natcher (Saskatchewan), Frank Palermo (Dalhousie), Robert Patrick (Saskatchewan), Craig Pauling (Te Runanga o Ngai Tahu), Kurt Peters (Oregon State), Libby Porter (Monash), Andrea Procter (Memorial), Sarah Prout (Combined Universities Centre for Rural Health, Australia), Catherine Robinson (Commonwealth Scientific and Industrial Research Organization, Australia), Shadrach Rolleston (Planning Consultant, New Zealand), Leonie Sandercock (British Columbia), Crispin Smith (Planning Consultant, Canada), Sandie Suchet-Pearson (Macquarie), Siri Veland (Brown), Ryan Walker (Saskatchewan), Liz Wedderburn (AgResearch, New Zealand).

It is Every Mother's Nightmare...Only Worse Eight-year-old Sophie Donohue just wanted to be like every other little girl. Which is why her mother, Janine, reluctantly agreed to let her go on the weekend camping trip with her Brownie troop. But when Janine arrives to pick up Sophie after the trip, her daughter is not with the others. Somehow, along the forested route from West Virginia, Sophie has disappeared. But Sophie is no ordinary eight-year-old. She suffers from a rare disease, and Janine has recently enrolled her in an experimental treatment as a last effort to save her life—despite the vehement objections of her ex-husband, Joe. Without her medication, Sophie cannot survive long. All her mother's instincts tell Janine that Sophie is alive, but time is running out. Deep in the Virginia forest, another drama unfolds. Sophie finds refuge in a remote cabin inhabited by Zoe, a woman who wants nothing to do with the child. Zoe is struggling to save her own daughter from the law, and Sophie's presence jeopardizes any chance of that happening. She is as determined to save her daughter as Janine is to save Sophie...and only one of them can succeed.

Recounts the author's misadventures following in the footsteps of idol Robert Louis Stevenson in the South Pacific, describing how his efforts to pursue sobriety in exotic locales enabled him to reconnect with family and the world's beauty.

Creating and maintaining health becomes more complicated and expensive by the heartbeat. "Take Back Your Body"] offers manageable, 500-word tips that are quick to read and simple to implement-plus many ways to save time and money. From a four-minute recipe for the Ultimate Smoothie to a five-minute workout, readers of "Take Back Your Body" shift from Health Care to Self Care with simple changes. Plus-they get healthier while saving hundreds of dollars a month at both the market and the pharmacy. Using humor and real-life stories of anonymous clients, "Take Back Your Body" offers practical ways for readers to save money and improve their health simultaneously. In a concise, entertaining, can-do format, chapters include: Food as Medicine-With A Sensual and Savory Experience on Top Exercise for the Rest of Us How Sex and Meditation Get You to the Same Place-and other Lifestyle Tips My Favorite Herbs for Healing and Prevention Special Issues for Women Special Issues for Men Time Savers (since no one has time to eat whole foods and exercise)
