The abbreviation gyr is also used. It breeds on Arctic coasts and tundra, and the islands of northern North America and the Euro Siberian region.*

*Gyrfalcon - Wikipedia*

Although the classic image of a Gyrfalcon is a regal white bird with black spotting, the birds occur in shades of white, gray, and dark brown. In North America, gray birds are more numerous than the other two morphs. Adults are heavily barred on the back, wings, and tail, with spotted underparts.

*Gyrfalcon Identification, All About Birds, Cornell Lab of ...*

Falco rusticolus This formidable predator, the largest falcon in the world, reigns over barren tundra and desolate coasts in the high Arctic. There it preys mostly on large birds such as ptarmigan and waterfowl, overtaking them in powerful flight.

*Gyrfalcon | Audubon Field Guide*

Gyrfalcon, (Falco rusticolus), Arctic bird of prey of the family Falconidae that is the world's largest falcon. Confined as a breeder to the circumpolar region except for isolated populations in Central Asian highlands, it is sometimes seen at lower latitudes in winters when food is scarce.

*Gyrfalcon | bird | Britannica*

The largest falcon in the world, the ghostly Gyrfalcon is a fierce predator in the High Arctic, where it chases down ptarmigans in flight or plummets from the sky at breathtaking speeds to strike prey to the ground.

*Gyrfalcon Overview, All About Birds, Cornell Lab of ...*

The gyrfalcon is a bird of prey, the largest falcon in the world. Its plumage varies with location, with birds being colored from all-white to dark brown. These color variations are called morphs and can be "white", "silver", "brown", and "black".

*Gyrfalcon - Facts, Diet, Habitat & Pictures on Animalia.bio*

Relatively long tail and broad wings with powerful flight. Generally darker above and paler below, with markings on belly ranging from small and crisp to big and chunky. Breeds on cliffs on Arctic tundra; winters in large open areas.

*Gyrfalcon - eBird*

The Gyrfalcon is the largest falcon in the world. Despite its size, it maintains a falcon-like profile with a long tail and long wings. Its wings are broader and more blunt at the tips than many other falcons. The plumage of the Gyrfalcon can take three main forms, white, gray, and dark, with many intermediate plumages.

*Gyrfalcon - BirdWeb*

Gyrfalcons are the largest falcon species in the world. Gyrfalcons have pointed wings, tail is long, bodies are stout and powerful and they come in shades of white, gray and browns. Gyrfalcons breed on arctic tundra and spend the winter in the northern tier of North America.
