How To Starve Cancer - Jean LaMantia

In December 2018, Jane published a book, "How to Starve Cancer," where she shared her story and her scientific research on using re-purposed drugs and supplements to attack cancer's metabolic (or feeding) pathways. Many of you have probably heard that cancer likes (or prefers) sugar (glucose). This is true for most cancers, but not all.

"Jane McLelland was only 30 when she was diagnosed with cancer. A few years later it was stage 4 (or terminal) and had spread to her lungs. Expected to live 12 weeks, she refused to believe there weren't any effective drugs or therapies. Her scientific training meant she was able to examine and digest hundreds of research papers she found in libraries, journals and online - and the conclusion she reached astonished her ... This is the story of how she took on her illness, changed her diet, educated herself, persuaded her oncologist and other doctors to prescribe her an unusual cocktail of commonly used drugs - some of which are already in many people's medicine cabinets - these made the difference between life and death ..."--Publisher description.

After being given a terminal diagnosis with only a few weeks to live, Jane dug up research, some decades old, in her quest to survive. Rather than aiming to cure cancer, which in many cases is unachievable, Jane's approach was to stop it growing. Remarkably her approach not only stopped it growing, it disappeared altogether. There are now clinics following her protocol, achieving remarkable successes. This book is a game-changing new dawn in the treatment of cancer. An international publishing sensation. This page-turning inspirational read is updated with a new 'Metro Map', Jane's unique and revolutionary route map to starving cancer. A glossary and index will also be included. Written in two sections, in Part 1 Jane intertwines her remarkable life story of 'terminal cancer' to full recovery, describing how she discovered a unique cocktail of off label drugs (drugs usually prescribed for other conditions) and supplements that effectively starve the cancer stem cell, the cell left behind by conventional treatment. Treatment for the stem cell is hailed as the Holy Grail, so this book plugs the missing piece into why we do not have a cure for cancer. Lead cancer researchers at top oncology centers are now using this book as a guide and Jane has a huge following of tens of thousands on Facebook. Testimonials abound from happy and delighted recovered patients and from oncologists who use her methods. National press, TV and radio have already covered Jane's ground-breaking research. Much more is in the pipeline with two documentaries and a possible movie in the future. Jane won the 'Amazing Women Global' Lifetime Achievement 2019 and the New York Big Book Award 2019

"One woman's extraordinary true story of courage, survival and a discovery that could transform the lives of millions."

You Are About To Learn The Ins And Outs Of Cancer, Including How To Starve Cancer Cells Naturally Using Different Techniques To Enhance The Effectiveness Of Therapy! Cancer is one of the leading causes of death in the world, accounting for about 10 million deaths, yet, according to the World Health Organization, many of these deaths can be avoided. If you've been affected directly or indirectly by this condition, having enough of the right information can save your life and that of anyone close to you, who might or might not have been diagnosed with it yet. But I imagine this is not the first place you've come looking for answers, in which case, you must have been wondering: What is the true nature of cancer? How does cancer grow? Is there a way to defeat the condition naturally? Can I survive and go back to normal if I am diagnosed with cancer? If I am right, then you're at the right place, which I'm proud to say will be the last place you'll ever visit to get answers. This book is here to give you a clear insight into one of the most frustrating conditions on the planet. It goes into the details of the nature of cancer, how cancer grows and how scientists starve the cancer cells to stop their proliferation and harm in the human body, as well as what you need to do to improve your body's fighting ability and reduce the risk of these harmful cells and so many other details that you need to know to understand this condition inside out. In a minute, you'll be armed with all the information you require to confidently know what is being done about cancer in the hidden cancer research and treatment facilities, and the part you have to play to handle and prevent it to save your life, or that of someone close to you. You don't have to waste another second, Click Buy Now With 1-Click or Buy Now to get started!

If you want to fight cancer, what should you eat? Do you believe that prevention is better than cure? Also do you fear that your lifestyle isn't healthy and may lead to serious illness? Or do you want to understand The Diet's Relationship with Cancer? The alkaline diet is the ultimate cancer-fighting diet due to its ability to provide all necessary nutrients that the body lacks to kick in its natural defenses. You see, a healthy body already has an internal mechanism that fights diseases and infections, including cancer. However, with our diet, we have weakened our system so that when some cancer cells come to be, for one reason or the other, our bodies are not well equipped to handle the challenge. It is also true that with the current diet, we have created quite a toxic environment so that our cells are surrounded by a toxic acidic environment that incites mutation. When a normal cells begins to go through the mutation process, it begins to subdivide and multiply at an incredibly rapid speed, so that tumors begin to develop. With time, a benign tumor can turn malignant, and the individual receives the earth-shattering diagnosis. With the alkaline diet, a positive cancer diagnosis should not scare you because with the diet, you will pack your body with the proper cancer-fighting nutrients and antioxidants, so that you remain healthy, and strong throughout your fight. You will be happy to know that there are some target foods you can take to intensify the fight for whichever cancer type you are battling. To that end, this book brings together the most accurate information in regards to cancer, the alkaline diet, the interaction between the two, information about diet pH and other critical details you ought to know as you dive into this pool of health. You will have a guide on the foods you can eat so that you do not keep guessing what you can and cannot eat. You will also be happy to know that this diet is not as restrictive as others, so you will not feel like you are missing out on anything. In this book you will learn: The most comprehensive and explicitly written details of the alkaline diet The most accurate information on cancer including what it is, how it comes about and different types of cancers The most plausible explanation for why cancer largely depends on the environment, both the natural and the man-made The clearest explanation of the relationship between cancer and the alkaline diet The most exhaustive list of alkaline foods that you should take up, along with their PRAL values and a list of the benefits they bring to your body A list of the cancers each food protects your from or helps you fight An explicit discussion of other diseases and conditions that the alkaline diet will help you fight Numerous credible testimonials of the benefits of the alkaline diet in regards to fighting cancer and other chronic conditions Pros and Cons of the Alkaline Diet

Starving Cancer Cells: Evidence-Based Strategies to Slow Cancer Progression — A Selection of Readings for Health Services Providers presents an edited and annotated collection of recent medical journal publications and abstracts illustrating new approaches to treatment derived from the metabolic theory of cancer. It intends to shed an early light on a relatively new approach to our understanding of the cancer cell idiosyncratic metabolic dysfunction, and on evidence-based new treatment strategies derived from that understanding. The book discusses topics such as tumor starvation by L-arginine deprivation; L-canavanine depriving tumors of L-arginine in pancreatic, multiple myeloma and breast cancer; glucose deprivation and intermittent fasting; glutamine uptake in cancer; the relation of oxygen-starved cancer cells with aspartate; and reducing tolerance of tumor cells to nutrition starvation. The content is presented in a contextualized and practical way in order to facilitate the transition from bench to bedside. This is a valuable resource for practitioners, oncologists and other members of healthcare chain who are interested in learning more about the most recent tumor cell starvation strategies and how they can improve overall treatment outcome. Provides extensive comments on scientific publications detailing recent findings about tumor cell auxotrophy applied to tumor cell starvation strategies Helps the reader to find relevant and practical information on cancer cell starvation, otherwise spread through niched specialized journals, in one single place Comments on the recent findings putting them in context of clinical practice in order to provide the reader with means of translating high level research to the clinics

Eat your way to better health with this New York Times bestseller on food's ability to help the body heal itself from cancer, dementia, and dozens of other avoidable diseases. Forget everything you think you know about your body and food, and discover the new science of how the body heals itself. Learn how to identify the strategies and dosages for using food to transform your resilience and health in *Eat to Beat Disease*. We have radically underestimated our body's power to transform and restore our health. Pioneering physician scientist, Dr. William Li, empowers readers by showing them the evidence behind over 200 health-boosting foods that can starve cancer, reduce your risk of dementia, and beat dozens of avoidable diseases. *Eat to Beat Disease* isn't about what foods to avoid, but rather is a life-changing guide to the hundreds of healing foods to add to your meals that support the body's defense systems, including: Plums Cinnamon Jasmine tea Red wine and beer Black Beans San Marzano tomatoes Olive oil Pacific oysters Cheeses like Jarlsberg, Camembert and cheddar Sourdough bread The book's plan shows you how to integrate the foods you already love into any diet or health plan to activate your body's health defense systems-Angiogenesis, Regeneration, Microbiome, DNA Protection, and Immunity-to fight cancer, diabetes, cardiovascular, neurodegenerative autoimmune diseases, and other debilitating conditions. Both informative and practical, *Eat to Beat Disease* explains the science of healing and prevention, the strategies for using food to actively transform health, and points the science of wellbeing and disease prevention in an exhilarating new direction.

In this important book, the authors present a nutritional regimen that helps dogs diagnosed with cancer maintain their body weight while at the same time denying the cancer what it needs to grow. Perhaps the scariest impact of cancer is seeing your dog's lean body mass waste away, causing them to rapidly lose strength. The recommendations in this book are not going to cure them, but it improves their quality of life and extends life expectancy. From the Foreword by Sarah Lyles, DVM, DACVIM (Oncology) Nutrition is a sensitive and sometimes controversial subject in veterinary medicine. As an oncologist, I want to make recommendations based on published data and science, of which there is little in the field of nutrition for veterinary oncology. There are so many ways to “ feed the body, ” to maintain health, decrease inflammation, and naturally promote healing for several conditions. For some chronic diseases, such as chronic kidney disease, nutrition is the main source of therapy! Unfortunately, for cancer, there is less data. Cancer is also diverse, with highly variable outcomes depending on cancer type and treatment modality chosen. With few publications showing proven benefits, I often feel I cannot make strong recommendations about dietary therapy for my cancer patients. It would be nice if more were known. However, Drs. Cowden and McMillan have compiled a comprehensive book of what is known. They have reviewed books and peer-reviewed articles on cancer nutrition in pets, to create a how-to guide and provide information all in one place. They did this for you, having been in your shoes. No more scouring the internet, uncertain if the recommendations are trustworthy, and feeling overwhelmed by conflicting opinions. Think of this book as a resource, providing you with everything you need to know about complete nutrition for your dog with cancer.

How to use the power of therapeutic diet and metabolic non-toxic therapies to destroy cancer cells while protecting healthy cells. This book is loaded with evidence-based research and real life case studies as well as recipes and guidance. The diet and techniques in this book were not meant to replace standard care procedures, but to compliment them. The protocol in this book has been proven to make chemotherapy and radiation therapy more effective while minimizing side effects such as cell damage, nausea, and cachexia.

Now in paperback, the Wall Street Journal best-selling guide to charting a path from cancer to wellness through a toxin-free diet, lifestyle, and therapy--created by a colon cancer survivor.
