Solutions Torques

A car pitches down in
Page 18/58

Download File PDF Mastering

front when the brakes are applied sharply.

Explain this observation in terms of torques.

Solution: The torque is given by, $t = rF$ Here, r is the distance of the axis of rotation to the force and F is the tangential force. When the brakes are applied, it causes the wheels to lock and then the friction plays the role to stop the car.
