If you've read our article on how wheels work, you'll know that a wheel and the axle it turns around is an example of what scientists call a simple machine: it will multiply force or speed depending on how you turn it. Bicycle wheels are typically over 50cm (20 inches) in diameter, which is taller than most car wheels.

Bicycle science - how bikes work and the physics behind them

The 2020 Overall Machine of the Year Award goes to Triumph's new Tiger 900 Rally Pro. The Rally Pro is the top-spec, off-road version of the Tiger 900, which replaced the 800 this year.
