Francisco Javier Carod-Artal, in Handbook of Clinical Neurology, 2013. Abstract. American trypanosomiasis is a parasitic disease caused by the flagellate protozoan *Trypanosoma cruzi*. Chagas disease is endemic in Latin America, where an estimated 10 – 14 million people are infected, and an emerging disease in Europe and the USA. *Trypanosoma cruzi* is transmitted by blood-sucking bugs of the ...

Neuroparasitology and Tropical Neurology: Chapter 24 —

Ocular Baylisascaris procyonis infection results from ingestion of infective eggs of *B. procyonis*, the raccoon ascarid. Herpes simplex virus type 2 (HSV-2) infection of the retina is the result of either primary infection or reactivated disease. Herein, we report a case of a 12-year-old female resident of the Bronx in New York City, who presented with pan-uveitis and vision loss.
