The installation and inspection of high pressure boiler piping for code compliance with the ASME and National Board. This book provides a comprehensive guide to the design, installation, and inspection of high pressure boiler piping. It covers the requirements of the ASME Boiler and Pressure Vessel Code and the National Board Inspection Code (NBIC). The book is written for engineers, inspectors, and technicians involved in the design, construction, and maintenance of high pressure boiler piping systems. It includes detailed drawings, tables, and a glossary of terms. The book is available in PDF format for download.
