If the 360 falls onto its side, the filter bag may be full. Empty the bag and resume normal operation of the cleaner. If emptying the bag does not solve the problem, remove the head float from the back of the machine and shake it. If you hear water inside, the float is damaged and needs to be replaced. Contact Polaris to order a new head float.

Page 2 1-800-822-7933 WARNING To avoid risk of potentially serious injury: • Do not handle the Polaris cleaner while it is operating, except when checking the wheel RPM. • Always remove the Polaris cleaner before swimmers enter the pool.

POLARIS 360 OWNER'S MANUAL Pdf Download | ManualsLib

Troubleshoot the 360 to fix any errors in operation. Running with Less Power Than Normal. Since the 360 is basically an automatic vacuum cleaner for your pool, there may be times when the machine starts to slow down due to the filters clogging with debris. If you notice the 360 slowing down, clean out all of the filters and baskets. Start with the filter screen in the quick disconnect on the hose.

Help Center — Troubleshooting A Polaris 360

A. Polaris 360 Components The Polaris 360 box contains: 1. All-Purpose Bag 2. Sweep Hose 3. Cleaner Head 4. Complete Feed Hose 5. Three Floats 6. Back-up Valve 7. Pressure Tester 8. Sweep Hose Scrubber 9. Quick Disconnect with Universal Wall Fitting Remove only the feed hose assembly from the box until you have determined that you have sufficient water pressure.

Polaris 360 Owner's Manual - RoyalSwimmingPools

Gauge the depth at the deepest aspect of your pool. Cut the lead hose segment (the first portion of the hose that's attached directly to the cleaner) to match the pool depth. Run the hose from the wall port to the distant point again. If it's still too long, cut equal parts from the remaining hose sections.

Polaris Pool Cleaner Troubleshooting: Top 10 Problems Solved

Shorten the Hose Length. One of the first steps in Polaris pool cleaner troubleshooting for tangles is to check the hose length. You do need a little play in the hose so the cleaner can move freely, but a too-long hose will have a hard time swiveling along with the cleaner.

Polaris Pool Cleaner Troubleshooting Made Easy

Place the mechanism in the backup valve case. Screw the case back together by hand, ensuring you do not overtighten. Examine the hose the backup valve is attached to. Ensure the backup valve opening points towards the Polaris 360 pool sweep. If a backup valve is facing the wrong direction, it will be unable to move the pool sweep away from the corners.

How to Troubleshoot a Polaris 360 Backup Valve | Hunker

Installation The 360 is packaged with a pressure tester installed on the hose. Simply attach the hose to the pool wall using the quick disconnect fitting. Turn the pump on. Make sure the cleaner has enough pressure to operate . To verify this, place your hand over the white pressure release on the wall fitting.

Polaris 360 Repair Manual | Vacuum Cleaner | Axle

For maximum efficiency, the Polaris should operate between 28 and 32 RPM. 1. Mark the single-wheel side tire. Page 8: Cleaning The Filter Bag The climbing ability of the Polaris depends on the pool's shape and water pressure or flow. The Polaris climbs best in pools without sharp angles or curves in the transition from the pool floor to the ...
