massive aerial towers and telescopic aerial ladders. The only book wholly devoted to the evolution of aerial firefighting, this lavishly-illustrated volume by one of America's most respected fire apparatus historians and authors covers them all: from long hook-and-ladder trucks drawn by straining three-horse hitches, early aerial ladders and the aerial's heavy-artillery cousin—the water tower. Included are four-wheel service aerials, glamorous tillered tractor-trailer types, compact rearmounts and versatile quintuple combinations.
