Originally published by HarperCollins in 1992.

Everything needed to pass the first part of the City & Guilds 2365 Diploma in Electrical Installations. Basic Electrical Installation Work will be of value to students taking the first year course of an electrical installation apprenticeship, as well as lecturers teaching it. The book provides answers to all of the 2365 syllabus learning outcomes, and one chapter is dedicated to each of the five units in the City & Guilds course. This edition is brought up to date and in line with the 18th Edition of the IET Regulations: It can be used to support independent learning or a college based course of study Full-colour diagrams and photographs explain difficult concepts and clear definitions of technical terms make the book a quick and easy reference Extensive online material on the companion website www.routledge.com/cw/linsley helps both students and lecturers

What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's "not there" often trumps what is. In the bestselling tradition of *The Tipping Point*, *Made to Stick*, and *The Black Swan*, *In Pursuit of Elegance* will change the way you think about the world.

In this book, philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism: that if we could reduce or eliminate pollution we could 'save' the planet without unduly disrupting our modern, industrialized societies. Lee argues instead that the process of modernization, with its attendant emphasis on technological innovation, has fundamentally transformed 'nature' into just another manmade 'artefact.' Ultimately, what needs to be determined is if nature has value above and beyond human considerations, whether aesthetic, spiritual, or biological. This provocative book attempts to reconfigure environmental ethics, positing the existence of two separate ontological categories—the 'natural' and the 'artefactual.' Natural entities, be they organisms or inert matter, are 'morally considerable' because they possess the ontological value of independence, whereas artefacts are created by humans expressly to serve their own interests and ends.

"West and Idema's *Monks, Bandits, Lovers, and Immortals* represents a milestone in the reception of early Chinese drama in the West. Not only do the translations of eleven plays take precision, readability, and range to new heights, but the substantial yet accessible Introduction, together with a number of useful appendices, illustrations, and tables, make it the anthology of choice for courses in Chinese literature, world literature, and theater." --Patricia Sieber, Ohio State University --- "This magnificent collection of eleven early [1250 1450] Chinese plays will give readers a vivid sense of life and a clear understanding of dramatic literature during an extraordinarily eventful period in Chinese history. Not only are the eleven plays in this volume expertly translated into lively, idiomatic English; they are each provided with illuminating, scholarly introductions that are yet fully intelligible to the educated lay reader. A marvelous volume." --Victor Mair, University of Pennsylvania

Taking an ecological approach to our evolution, Clive Finlayson considers the origins of modern humans within the context of a drying climate and changing landscapes. Finlayson argues that environmental change, particularly availability of water, played a critical role in shaping the direction of human evolution, contributing to our spread and success. He argues that our ancestors carved a niche for themselves by leaving the forest and forcing their way into a long-established community of carnivores in a tropical savannah as climate changes opened up the landscape. They took their chance at high noon, when most other predators were asleep. Adapting to this new lifestyle by shedding their hair and developing an active sweating system to keep cool, being close to fresh water was vital. As the climate dried, our ancestors, already bipedal, became taller and slimmer, more adept at travelling farther in search of water. The challenges of seeking water in a drying landscape moulded the minds and bodies of early humans, and directed their migrations and eventual settlements. In this fresh and provocative view of a seven-million-year evolutionary journey, Finlayson demonstrates the radical implications for the interpretation of fossils and technologies and shows that understanding humans within an ecological context provides insights into the emergence and spread of *Homo sapiens sapiens* worldwide.

Get to grips with a new technology, understand what it is and what it can do for you, and then get to work with the most important features and tasks. A concise guide written in an easy-to-follow format following the Starter guide approach. This book is for people who have not used Spring Security before and want to learn how to use it effectively in a short amount of time. It is assumed that readers know both Java and HTTP protocol at the level of basic web programming. The reader should also be familiar with Inversion-of-Control/Dependency Injection, preferably with the Spring framework itself.

How to Build a Great Screenplay is a definitive guide on the mechanics of screenwriting--filled with examples--from the author of *The Tools of Screenwriting*. Acclaimed USC screenwriting teacher David Howard has guided hundreds of students to careers in writing for film and television. Drawing on decades of practical experience and savvy, *How to Build a Great Screenplay* deconstructs the craft of screenwriting and carefully reveals how to build a good story from the ground up. Howard eschews the "system" offered by other books, emphasizing that a great screenplay requires dozens of unique decisions by the author. He offers in-depth considerations of: * characterization * story arc * plotting and subplotting * dealing with coincidence in story plotting * classical vs. revolutionary screenplay structure * tone, style, and atmosphere * the use of time on screen * the creation of drama and tension * crucial moments in storytelling Throughout the book, Howard clarifies his lessons through examples from some of the most successful Hollywood and international script-oriented films, including *Pulp Fiction*, *American Beauty*, *Trainspotting*, *North by Northwest*, *Chinatown*, and others. The end result is what could very well become the classic text in the field---a bible for the burgeoning screenwriter.
