# Where To Download Reactive Web Applications With Scala Play And Reactive Streams

Reactive applications build on top of components that communicate asynchronously as they react to user and system events. As a result, they become scalable, responsive, and fault-tolerant. Java and Scala developers can use the Play Framework and the Akka concurrency toolkit to easily implement reactive applications without building everything from scratch.

## Manning | Reactive Web Applications

a decentralized setting he adds on the jvm the only mature full stack reactive web application framework is the play framework as for scala one of the main design goals of the Building Web Applications With Scalajs And React Part 1
