This data set specifically addresses

the light commercial market, which is a specialized niche in the construction industry. This aids you, the owner/designer/contractor in preparing all types of estimates from preliminary budgets to detailed bids.

The focus of this data set is on new,

# Download Free Rs Means

Commercial, interior construction. It is aimed primarily at estimating commercial and industrial projects or large multi-family housing projects costing \$3,500,000 or more. Although it captures data from each MasterFormat division, the divisions typically associated

with exterior construction have been abbreviated.

Those divisions with an interior focus (9, 10, 11, and 12) have been expanded. The wage rate is union and the assumption is that the installing contractor has annual billings of \$4,000,000 or more. Since the data set includes both

unit price and assembly formats, this data set can be used to develop budget as well as detailed estimates.
