Use Case: Work planned in advance. Breakdown maintenance: work that has to be executed in emergency. Calibration maintenance: ensures that precision instruments keep accurate measurements.

SAP Maintenance Order Management - ERPfixers

Orders form an important part in SAP Plant Maintenance. Orders are cost collectors and you cannot do any maintenance without an order. Orders store the actual time spend on maintenance tasks, the consumption of spare parts, and if an outside vendor has done some repair, the invoice finds a place in the PM order too.

SAP PM - Maintenance Planning - Tutorialspoint

The work order allows the monitoring of production process at the supplier: SAP SNC compares the planned data and the actual data for the work order. In addition, SAP SNC uses the planned data or the actual data to calculate the actual attainable product quantity and anticipated date/time that this quantity will be available. Deviations (such as an insufficient projected yield due to scrap that is too high) are thus visible early on, so that customer and supplier can take
