**100 Snake Facts That Will Swallow You Whole | Facts.net**

Amazing Facts About the Snake. There are over 3000 kinds of snakes in the world. They are present in every continent except Antarctica. Snakes, like other reptiles, are cold-blooded. This means that their body temperature changes in according to the temperature of their environment, unlike warm-blooded animals whose temperature remains constant. Snakes which live in colder climates will therefore hibernate in winter as it would otherwise be too cold for them to survive.

Snakes are found on every continent of the world except Antarctica. Snakes have internal ears but not external ones.

**Fun Snake Facts for Kids - Interesting Information about ...**

Curious that a book on Snakes would have a lizard on the cover. Fact No.1 Unlike most lizards, snakes do not possess eyelids, much less a row of small scales around the eye, so this artwork seems to portray a lizard with very saurian scalation. Okay, snakes are really just highly advanced lizards, but this is quite a faux pas.
