Example If we consider a spring-mass system as shown in Figure 1.3 with the properties $m = 10$ kg and $k = 100$ N/m and if give the mass a deflection of 20 mm and then release it (i.e. set it in motion) we would observe the system oscillating as shown in Figure 1.3.

About this book. This book covers structural dynamics from a theoretical and algorithmic approach. It covers systems with both single and multiple degrees-of-freedom. Numerous case studies are given to provide the reader with a deeper insight into the

Bookmark File PDF Solutions

practicalities of the area, and the solutions to these case studies are given in terms of real-time and frequency in both geometric and modal spaces.
