This volume presents a systematic and comprehensive analysis of the Spanish evidential semi-auxiliaries *parecer* and *resultar*, the modal constructions with *amenazar* and *prometer*, and the modal auxiliaries *poder*, *deber* and *tener que*. These verbs have never been considered together in a global approach that transcends the classical "verbal periphrases" model. The book proposes a cognitive-functional account of evidentiality and modality in Spanish with special attention to subjectivity and grounding. The theoretical reflection relies on empirical evidence of two sorts: synchronic and diachronic corpus-analyses alternate with tests that measure the semantic and pragmatic compatibility of the evidential and epistemic constructions with specific sentences. Following the assumption that linguistic forms are determined by their meaning, the array of constructions that characterizes the different verbs justifies their grouping in three pairs of (semi-)auxiliaries: *parecer* vs *resultar*, *amenazar* vs *prometer* and *poder* vs *deber/tener que*. The distributional differences observed in the corpus are further shown to correlate with different degrees of grammaticalization. Primarily intended for scholars working in the field of Spanish functional linguistics, the monograph is also relevant for grammaticalization studies and for cognitive-semantic research at large. Given its combined theoretical and applied character, the volume is also of interest to anyone concerned with syntactic processes, lexical semantics or the wider area of discourse analysis and pragmatics.

The dictionary expands on the original idea of Karttunen and Lockhart to map the usage of loans in Nahuatl, by using a much larger and diversified corpus of sources, and by including contextual use, missing in earlier studies. Most importantly, these sources enrich the colonial corpus with modern data - significantly expanding on our knowledge on language continuity and change.

The Catholic Church acted as a mediator during social and political change in several Latin American countries from the 1960s through the 1990s: the Dominican Republic, Bolivia, Guatemala, Nicaragua, and El Salvador. Although the Catholic clergy was called to mediate in political crises in all five countries, in the Dominican Republic the Church's role as mediator was eventually institutionalized. A historical examination of church-state relations and case study of the Dominican Republic leads into important regional comparisons that broaden our understanding of the Catholic Church in the whole of Latin America.

Delving into the Portuguese imperial experience, 'Moorings' enriches our understanding of historical and literary imagination during a significant period of Western expansion.

Long a favorite on dance floors in Latin America, the porro, cumbia, and vallenato styles that make up Colombia's música tropical are now enjoying international success. How did this music—which has its roots in a black, marginal region of the country—manage, from the 1940s onward, to become so popular in a nation that had prided itself on its white heritage? Peter Wade explores the history of música tropical, analyzing its rise in the context of the development of the broadcast media, rapid urbanization, and regional struggles for power. Using archival sources and oral histories, Wade shows how big band renditions of cumbia and porro in the 1940s and 1950s suggested both old traditions and new liberties, especially for women, speaking to a deeply rooted image of black music as sensuous. Recently, nostalgic, "whitened" versions of música tropical have gained popularity as part of government-sponsored multiculturalism. Wade's fresh look at the way music transforms and is transformed by ideologies of race, nation, sexuality, tradition, and modernity is the first book-length study of Colombian popular music.

This book presents the state-of-art in regenerative procedures currently applied by aesthetic physicians, plastic surgeons and dermatologists. It is divided into two parts, the first of which provides a detailed introduction to

aesthetic medicine and the aging process. The second part, in turn, addresses the current status of techniques and technologies with regard to autologous grafts, covering fat transfer, blood grafts, skin grafts and stem cells. The book examines the surgical applications of these grafts, as well as potential side effects and limitations. Therapy combinations and outcomes round out the coverage. Aesthetic physicians, plastic surgeons and dermatologists interested in performing regenerative procedures for aesthetic purposes will find this book to be a valuable guide.

Disabled Bodies in Early Modern Spanish Literature: Prostitutes, Aging Women and Saints examines the concepts and role of women in selected Spanish discourses and literary texts from the late fifteenth to seventeenth centuries from the perspective of feminist disability theories. This study explores a wide range of Spanish medical, regulatory and moral discourses, illustrating how such texts inherit, reproduce and propagate an amalgam of Western traditional concepts of female embodiment. It goes on to examine concrete representations of deviant female characters, focusing on the figures of syphilitic prostitutes and physically decayed aged women in literary texts such as *Celestina*, *Lozana andaluza* and selected works by Cervantes and Quevedo. Finally, an analysis of the personal testimony of Teresa de Avila, a nun suffering neurological disorders, complements the discussion of early modern women's disability. By expanding the meanings of contemporary theories of materiality and the social construction of disability, the book concludes that paradoxically, femininity, bodily afflictions, and mental instability characterized the new literary heroes at the very time Spain was at the apex of its imperial power. Ultimately, as this study shows, the broken female bodies of pre-industrial Spanish literature reveal the cracks in the foundational principles of power and established truths.
